

Quality Findings Report

Prepared by Ruknuddin Asrari | August 14, 2026

Executive Findings

Core functionality is broadly compatible. The primary risk is responsive CTA overflow on narrow mobile widths. Firefox compatibility scenarios also show form-control and card-height consistency issues, while Edge has a low-severity focus-outline observation.

Browser Summary

Browser	Assessment	Key Note
Chrome	Pass with Minor Fix	Mobile CTA responsive issue
Microsoft Edge	Pass with Minor Fix	Mobile CTA plus low-severity focus outline
Firefox	Needs Minor Fixes	Form-control height and tablet card-height consistency

Quality Decision

Ready with Minor Fixes after correction and regression testing of the documented compatibility issues.
