

Screenshots / Evidence

Prepared by Ruknuddin Asrari | August 14, 2026

Evidence images are generated from the controlled test fixture and compatibility-review scenarios. They are not presented as screenshots from a live production system.

01 Chrome Desktop Pass

The screenshot shows a browser window with a light blue header bar containing three colored circles (red, yellow, green) and a text field displaying 'controlled-test-fixture.local / Chrome / 1440x900'. The main content area has a white background and features a large blue-bordered box. Inside this box, the text 'Severity: Low' is in bold blue. Below it, a paragraph states: 'Core page layout, navigation, cards, form controls, images/text, and CTA render consistently in the controlled Chromium baseline.' This is followed by 'Result' in bold, with 'PASS' underneath. Then 'Recommendation' is in bold, with 'Use this as the baseline for comparison with other browser contexts.' below it. At the bottom of the white area, there is a small grey box containing the text: 'Evidence generated from the controlled audit fixture / compatibility-review scenario. It is not represented as a screenshot from a live production system.' and 'Prepared by Ruknuddin Asrari | Software Quality Engineer'.

Chrome Desktop Baseline
Chrome - 1440x900

Severity: Low

Core page layout, navigation, cards, form controls, images/text, and CTA render consistently in the controlled Chromium baseline.

Result
PASS

Recommendation
Use this as the baseline for comparison with other browser contexts.

Evidence generated from the controlled audit fixture / compatibility-review scenario.
It is not represented as a screenshot from a live production system.

controlled-test-fixture.local / Firefox / 1440x900

Firefox Form Control Consistency

Firefox - 1440x900

Severity: Medium

The modeled Firefox compatibility condition shows a select control height that differs from the text input.

Issue
Input/select height mismatch

Recommendation
Normalize min-height, line-height, padding, font inheritance, and appearance rules.

Evidence generated from the controlled audit fixture / compatibility-review scenario.
It is not represented as a screenshot from a live production system.

Prepared by Ruknuddin Asrari | Software Quality Engineer

03 Edge Focus Outline Observation

controlled-test-fixture.local / Microsoft Edge / 1440x900

Edge Focus Outline Observation

Microsoft Edge - 1440x900

Severity: Low

The compatibility review identifies a focus indicator placed too close to a parent container boundary.

Issue
Focus outline may look clipped

Recommendation
Use outline-offset and avoid overflow clipping on focusable-control containers.

Evidence generated from the controlled audit fixture / compatibility-review scenario.
It is not represented as a screenshot from a live production system.

04 Tablet Card Height Issue

controlled-test-fixture.local / Firefox / 768x1024

Tablet Card Height Consistency

Firefox - 768x1024

Severity: Medium

Text wrapping can produce uneven service-card heights in the modeled tablet compatibility condition.

Issue
Uneven card rows

Recommendation
Use consistent card min-height or grid auto-row alignment and predictable wrapping.

Evidence generated from the controlled audit fixture / compatibility-review scenario.
It is not represented as a screenshot from a live production system.

05 Mobile Cta Overflow

controlled-test-fixture.local / Chrome / Edge / Firefox / 390x844

Mobile CTA Overflow

Chrome / Edge / Firefox - 390x844

Severity: High

The primary CTA is wider than the content area at narrow mobile widths and can wrap or overflow.

Issue

Responsive button sizing

Recommendation

Use max-width:100%, flexible padding, responsive type sizing, and retest 320-430px widths.

Evidence generated from the controlled audit fixture / compatibility-review scenario.
It is not represented as a screenshot from a live production system.

06 Sample App Audit Scope

controlled-test-fixture.local / Cross-Browser Audit Fixture / Desktop / Tablet / Mobile

Controlled Sample Application Audit Scope

Cross-Browser Audit Fixture - Desktop / Tablet / Mobile

Severity: Low

A reproducible sample fixture is included so reviewers can inspect the layout, navigation, cards, forms, buttons, and responsive CSS used by the QA package.

Scope
Page layout, links, forms, images/text, responsive behavior, keyboard focus

Note
Replace modeled evidence with live browser captures when a production URL is provided.

Evidence generated from the controlled audit fixture / compatibility-review scenario.
It is not represented as a screenshot from a live production system.
